TAP AGREEMENT CONTRACT

The applicant agrees:

- To provide a location on the premises one to five feet inside the property line along the road right of way, where the meter will be fully accessible to SJWD employees or its assigns to conduct normal District business.
- SJWD will install the meter outside the property line. Customer is responsible for connecting the meter to the building.
- To pay for any expense of relocating the meter box, or raising or lowering the meter due to grade changes after the meter box has been set.
- The meter box and all contained equipment is the property of SJWD Water District. SJWD will install a gate valve, for new taps, for customer use, and maintain this valve for one year after installation. After one year, the valve maintenance becomes the responsibility of the customer.
- Taps are installed in the order in which they are received.
- Applicant may elect to delay the installation up to six months, and understands that the tap order will be placed at the end of the tap list when the order is reactivated.
- If the tap is delayed more than six months, the tap fee will be refunded and a \$25.00 processing fee will be assessed.
- Billing will begin upon installation of tap. If no water is used or meter is not connected to a building, a minimum charge will apply.
