METER INSTALLATION AGREEMENT

By signing below, the customer understands and agrees to the following:

1. Meter Location:

- Customer shall provide a location on the premises, just inside the property line along the public road right-of-way, where the meter will be fully accessible to SJWD employees or its assigns to conduct normal SJWD business. Customer is responsible for connecting the meter to the building.
- Meters shall not be placed in driveways.
- All trees, shrubs, and fences shall be placed so as to permit convenient access to the water meter. SJWD assumes no liability if trees, shrubs or fences are damaged during maintenance. If a fence is erected after the meter has been installed, the fence shall be set back or offset so that the water meter is completely outside the fence.
- Lots are to be at grade before meter boxes are installed. Customer shall pay for any expense of relocating the meter, or raising or lowering the meter box due to grade changes after the box has been set.
- In the event the customer desires any change in location of the meter after it has been installed, such change in location, if approved, shall be made by SJWD at the expense of the customer not to exceed the current tap fee for that meter size.

2. Ownership & Maintenance:

- The meter box and all contained equipment therein are the property of SJWD.
- For new taps, SJWD will install a gate valve (cut-off valve) just behind the meter box for customer use. SJWD will maintain this valve for one year. After one year, the valve maintenance becomes the responsibility of the customer.

3. Meter Installation & Billing:

- Meters are installed in the order in which they are received.
- Billing will begin upon installation of the meter.
