

**We are growing!**

Over the past 26 years our water rates have remained unchanged. However, as we continue to address our aging infrastructure needs and plan for the future, it is time to make some adjustments. Modest modifications now will help ensure the reliability and affordability of water service for our current and future customers as every dollar received from water rates is reinvested back into our water system. We appreciate your understanding as we continue to improve the SJWD Water System. Please visit our website at [www.sjwd.com](http://www.sjwd.com) for more information!

**What does this mean to the average residential Customer?**

Based on an average household monthly usage most customers will see less than a \$1 difference in their monthly bill.

SJWD Water Rates  
(Effective January 1, 2022)

Monthly Base Charge		
Meter Size	Inside	Outside
5/8"	\$ 10.00	\$ 13.50
